### **Soft Skills**

Time Management: | Attention to Detail. | Good Communication and Writing Skills | Problem Solving (Problem Analysis)

## **PROJECTS**

---

[ 01/08/2022 – 01/10/2023 ] **Young Programmers Training Session**

The 'Realize Your Idea 2022' youth individual project grant competition, implemented by the Youth Foundation of the Republic of Azerbaijan, includes a winning project led by Jabbarli Alyasar, titled 'Training Session for Young Programmers'. The project was carried out at the Youth Organizations Resource Center from January 6 to February 3, with the support of the Youth Foundation of the Republic of Azerbaijan and in partnership with the 'Support to Youth Education' Public Union.

Within the framework of the project, out of about 200 young people who registered, 25 were successfully chosen through an interview phase to participate. During the training, participants learned basic HTML5, CSS3, and JavaScript technologies, taught by instructor Idris Aziyev, and further honed their skills and knowledge through additional laboratory days. At the end of the training, participants presented their individual projects using HTML, CSS, and JavaScript.

Those who successfully completed their individual projects were awarded graded certificates. Active participants in the project were also rewarded with certificates. During the project, participants were extensively informed about programming technologies, web page development, front-end and back-end technologies, by professionals in the field.

The main goal of the project is to increase the interest of young people in programming, a requirement of the 21st century, and to closely support the enhancement of their knowledge and skills in the front-end domain.
